To Whom It May Concern:

I've had the pleasure of working with Tom Kapusta and his team of Architects and Designers on several occasions over the last few years and would like to offer my full endorsement of their capabilities and talent.

Not only are the designs of TKA+Partners competently produced according to their Client's goals, but they professionally respond to the demands of tight schedules and budget management.

Their thoroughness and attention to the requests of the entire team, is respected by everyone involved on the project. This is true from the initial programming of the design requirements to the post-construction wrap up.

I would recommend serious consideration of TKA+Partners for any design project.
